

SHOW-UP • STAND-UP • KEEP-UP

RECON 9 – (9'4" X 29")

Performance Surf –

A fast progressive rocker profile with narrow pintail and thinned out rails enables you to set your edge for aggressive turns. Excels in swells from 4' to 8'. Complete with (4) SIC fins (FCS compatible). Can be ridden as a quad, thruster or twin fin.

Weight range: from 125 to 200 Lbs.

CONSTRUCTION:

"Tuff-Wood Custom Composite" construction with Carbon rail wrap for a high performance feel.

RECON 10 – (10'6" X 34")

Performance Surf –

The big brother of the Recon 9, this board easily drops in on slower breaks and for the larger rider, will give you a 9'6" feel on a 10'6" ride. Complete with (4) SIC fins (FCS compatible). Can be ridden as a quad, thruster or twin fin.

Weight range: from 150 to 250 Lbs.

CONSTRUCTION:

"Tuff-Wood Custom Composite" with Carbon rail wrap for a high performance feel.

X-12 – (12'6" X 28")

Flat-water Race and Touring Board –

With its wave piercing bow, and a quick transition to flat, this "Stock Class" board has a good glide in "displacement mode" while in calm waters, and is stable when in "planing mode" in choppy conditions. Sharp rails at the tail shear water for unlimited speed.

Weight range: from 125 to 205Lbs.

CONSTRUCTION:

The X-12 is available in 2 constructions.

- (1.) "Semi Custom Carbon" at W-28" wide, and
 - (2.) Durable "Tuff-Wood Custom Composite" at W-29 1/2" wide,
- Standard features include proprietary EZ-Grab handle and can be rigged with a cargo net.

X-14 – (14'0" X 29 1/2")

Flat-water Race and Touring board –

A scaled up version of the X-12, this missile provides unrivaled flat-water speed. Its sharp displacement bow is like a knife through flat water and chop. The quick transition to flat provides stability and keeps the board in glide mode between strokes. Sharp rails at the tail shear water for unlimited speed.

Weight range: from 140 to 230Lbs.

CONSTRUCTION:

The X-14 is available in 2 constructions.

- (1.) "Semi Custom Carbon" and
 - (2.) In a durable "Tuff-Wood Custom Composite", both have a width of W-29 1/2" wide,
- Standard features include proprietary EZ-Grab handle and can be rigged with a cargo net.

BULLET 11 – (11'0" X 28 1/4")

Fitness, Open Water Touring –

A versatile fitness and touring board with a graceful glide. The low nose rocker creates a long effective water line combining with a slight single concave for easy acceleration, graduating to flat through the middle for stability and for better glide. The design finishes with panel-V design in the tail for a falling sea and increased maneuverability.

Weight range: from 100 to 175 Lbs.

CONSTRUCTION:

Ultra-light "Semi Custom Carbon", Standard features include proprietary EZ-Grab handle and can be rigged with a cargo net.

BULLET 12 – (12'6" X 28 1/4")

Fitness, Open Water Race and Touring –

This racehorse was created for the SIC Race-Team who demanded the fastest, yet stable board with ultra-quick acceleration and superior control. Incidentally, offshore race boards have also proven to make some of the most versatile fitness and touring boards. Paddle with ease and see more on your tour.

Weight range: from 140 to 215 Lbs.

CONSTRUCTION:

The Bullet 12 is available in 2 constructions.

- (1.) "Semi Custom Carbon" and
 - (2.) Durable "Tuff-Wood Custom Composite"
- Both have a width of W-29 1/2" Standard features include proprietary EZ-Grab handle and can be rigged with a cargo net.

BULLET 14 – (14'0" X 27 1/4")

Fitness, Open Water Race and Touring –

While designing this board, all emphasis went into getting riders to connect from swell to swell and across the gnarliest conditions. With countless first place finishes in the 14' class, the Bullet 14 is a proven winner. We don't need to brag about this board. The results and athletes who ride it say it all.

Weight range: from 140 to 215 Lbs.

CONSTRUCTION:

Available in 2 constructions.

- (1.) "Semi Custom Carbon" and
- (2.) durable "Tuff-Wood Custom Composite".

Both have a width of W-29 1/2" wide, Standard features include proprietary EZ-Grab handle and can be rigged with a cargo net. Optional with or without SIC's proprietary Active Steering System

BULLET 17 – (17'4" X 28 5/8")

Open Water Race –

This inter-island missile has a narrow outline and efficient rocker-profile keeping you into the energy zone of the swell while maintaining the highest average speed. Its flat gliding bottom design delivers tremendous glide and stability. The panel-V tail keeps the nose elevated and enables greater maneuverability on the swell face and in chop.

Weight range: from 150 to 225 Lbs.

CONSTRUCTION:

Double Carbon Epoxy Sandwich Composite lay-up, standard equipped with SIC's proprietary A.S.S Steering System plumbed for either regular or goofy foot. Also with handle and carrying loops.

F-16 – (16'0" X 27 1/8")

Open Water Race –

The F-16 can be best described as a fast, yet forgiving and fun performance board battling and conquering tight chop, high winds or late drops. One of the top contenders in the Molokai to Oahu race and a perfect board for conditions like Hood River or Lake Garda.

Weight range: from 145 to 220 Lbs.

CONSTRUCTION:

Double Carbon Epoxy Sandwich Composite lay-up, standard equipped with SIC's proprietary A.S.S Steering System plumbed for either regular or goofy foot. Also with handle and carrying loops.
